CPPA Chair Jennifer Urban,

I strongly urge the CPPA to adopt its proposed regulations for businesses using automated decisionmaking technologies that would protect Californians' safety, privacy, and informed consent.

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations.

Kevin Bradbury

CPPA Chair Jennifer Urban,

We've seen with United Healthcare what happens when an AI's algorithms are bad - a 90%+ rejection rate for health care procedures that legally should have been covered. Thousands of people affected, people dead - and United Healthcare KNEW their AI's algorithms were faulty. For this and many other similar incidents, I strongly urge the CPPA to adopt its proposed regulations for businesses using automated decision-making technologies that would protect Californians' safety, privacy, and informed consent.

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations. The tech industry wants to run wild, and we've seen the damage that does. It's your responsibility to protect the people, not Big Tech.

CCPA CCPA CCPA,

I strongly urge the CCPA to adopt its proposed regulations for businesses using automated decisionmaking technologies that would protect Californians' safety, privacy, and informed consent.

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations.

CPPA CPPA CPPA,

I strongly urge the CPPA to adopt its proposed regulations for businesses using automated decisionmaking technologies that would protect Californians' safety, privacy, and informed consent.

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations.

CPPA CPPA CPPA,

I strongly urge the CPPA to adopt its proposed regulations for businesses using automated decisionmaking technologies that would protect Californians' safety, privacy, and informed consent.

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations.

Paula

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations.

CPPA Chair Jennifer Urban,

I strongly urge the CPPA to adopt its proposed regulations for businesses using automated decisionmaking technologies that would protect Californians' safety, privacy, and informed consent.

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations.
