CPPA CPPA CPPA,

I strongly urge the CPPA to adopt its proposed regulations for businesses using automated decisionmaking technologies that would protect Californians' safety, privacy, and informed consent.

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations.

These common sense rules are a vital intervention for consumer protection and human rights as unaccountable algorithms increasingly influence our housing, education, employment, and basic freedoms. These rules should reflect the needs of everyday people to be protected from discrimination and data scraping, not Big Tech's appetite for profiting from our personal info.

Please stand strong, defend our rights to algorithmic transparency and accountability, and adopt the amended regulations.
